What Is Lead Conversion?

- Lead conversion is the process of turning interest into action
- It's not just a "yes"—it's about every step:

-  Building trust
-  Following up
-  Knowing when to push or pause
-  It's where your work turns into results

 Leads don't convert on Day 1—this is the system that keeps them moving forward.

📌 Why Lead Conversion Matters

- Most leads take time to close—days, weeks, sometimes months
- Without a system, it's easy to forget or lose track of follow-ups
- Good leads can fall through the cracks if you don't follow through
- Better follow-up = better conversions = more deals without more spend

📝 Example: If two people generate 50 leads—but only one follows up consistently—guess who gets more deals?
